

HELLY HANSEN  
**2012/2013**  
COLLECTION

---

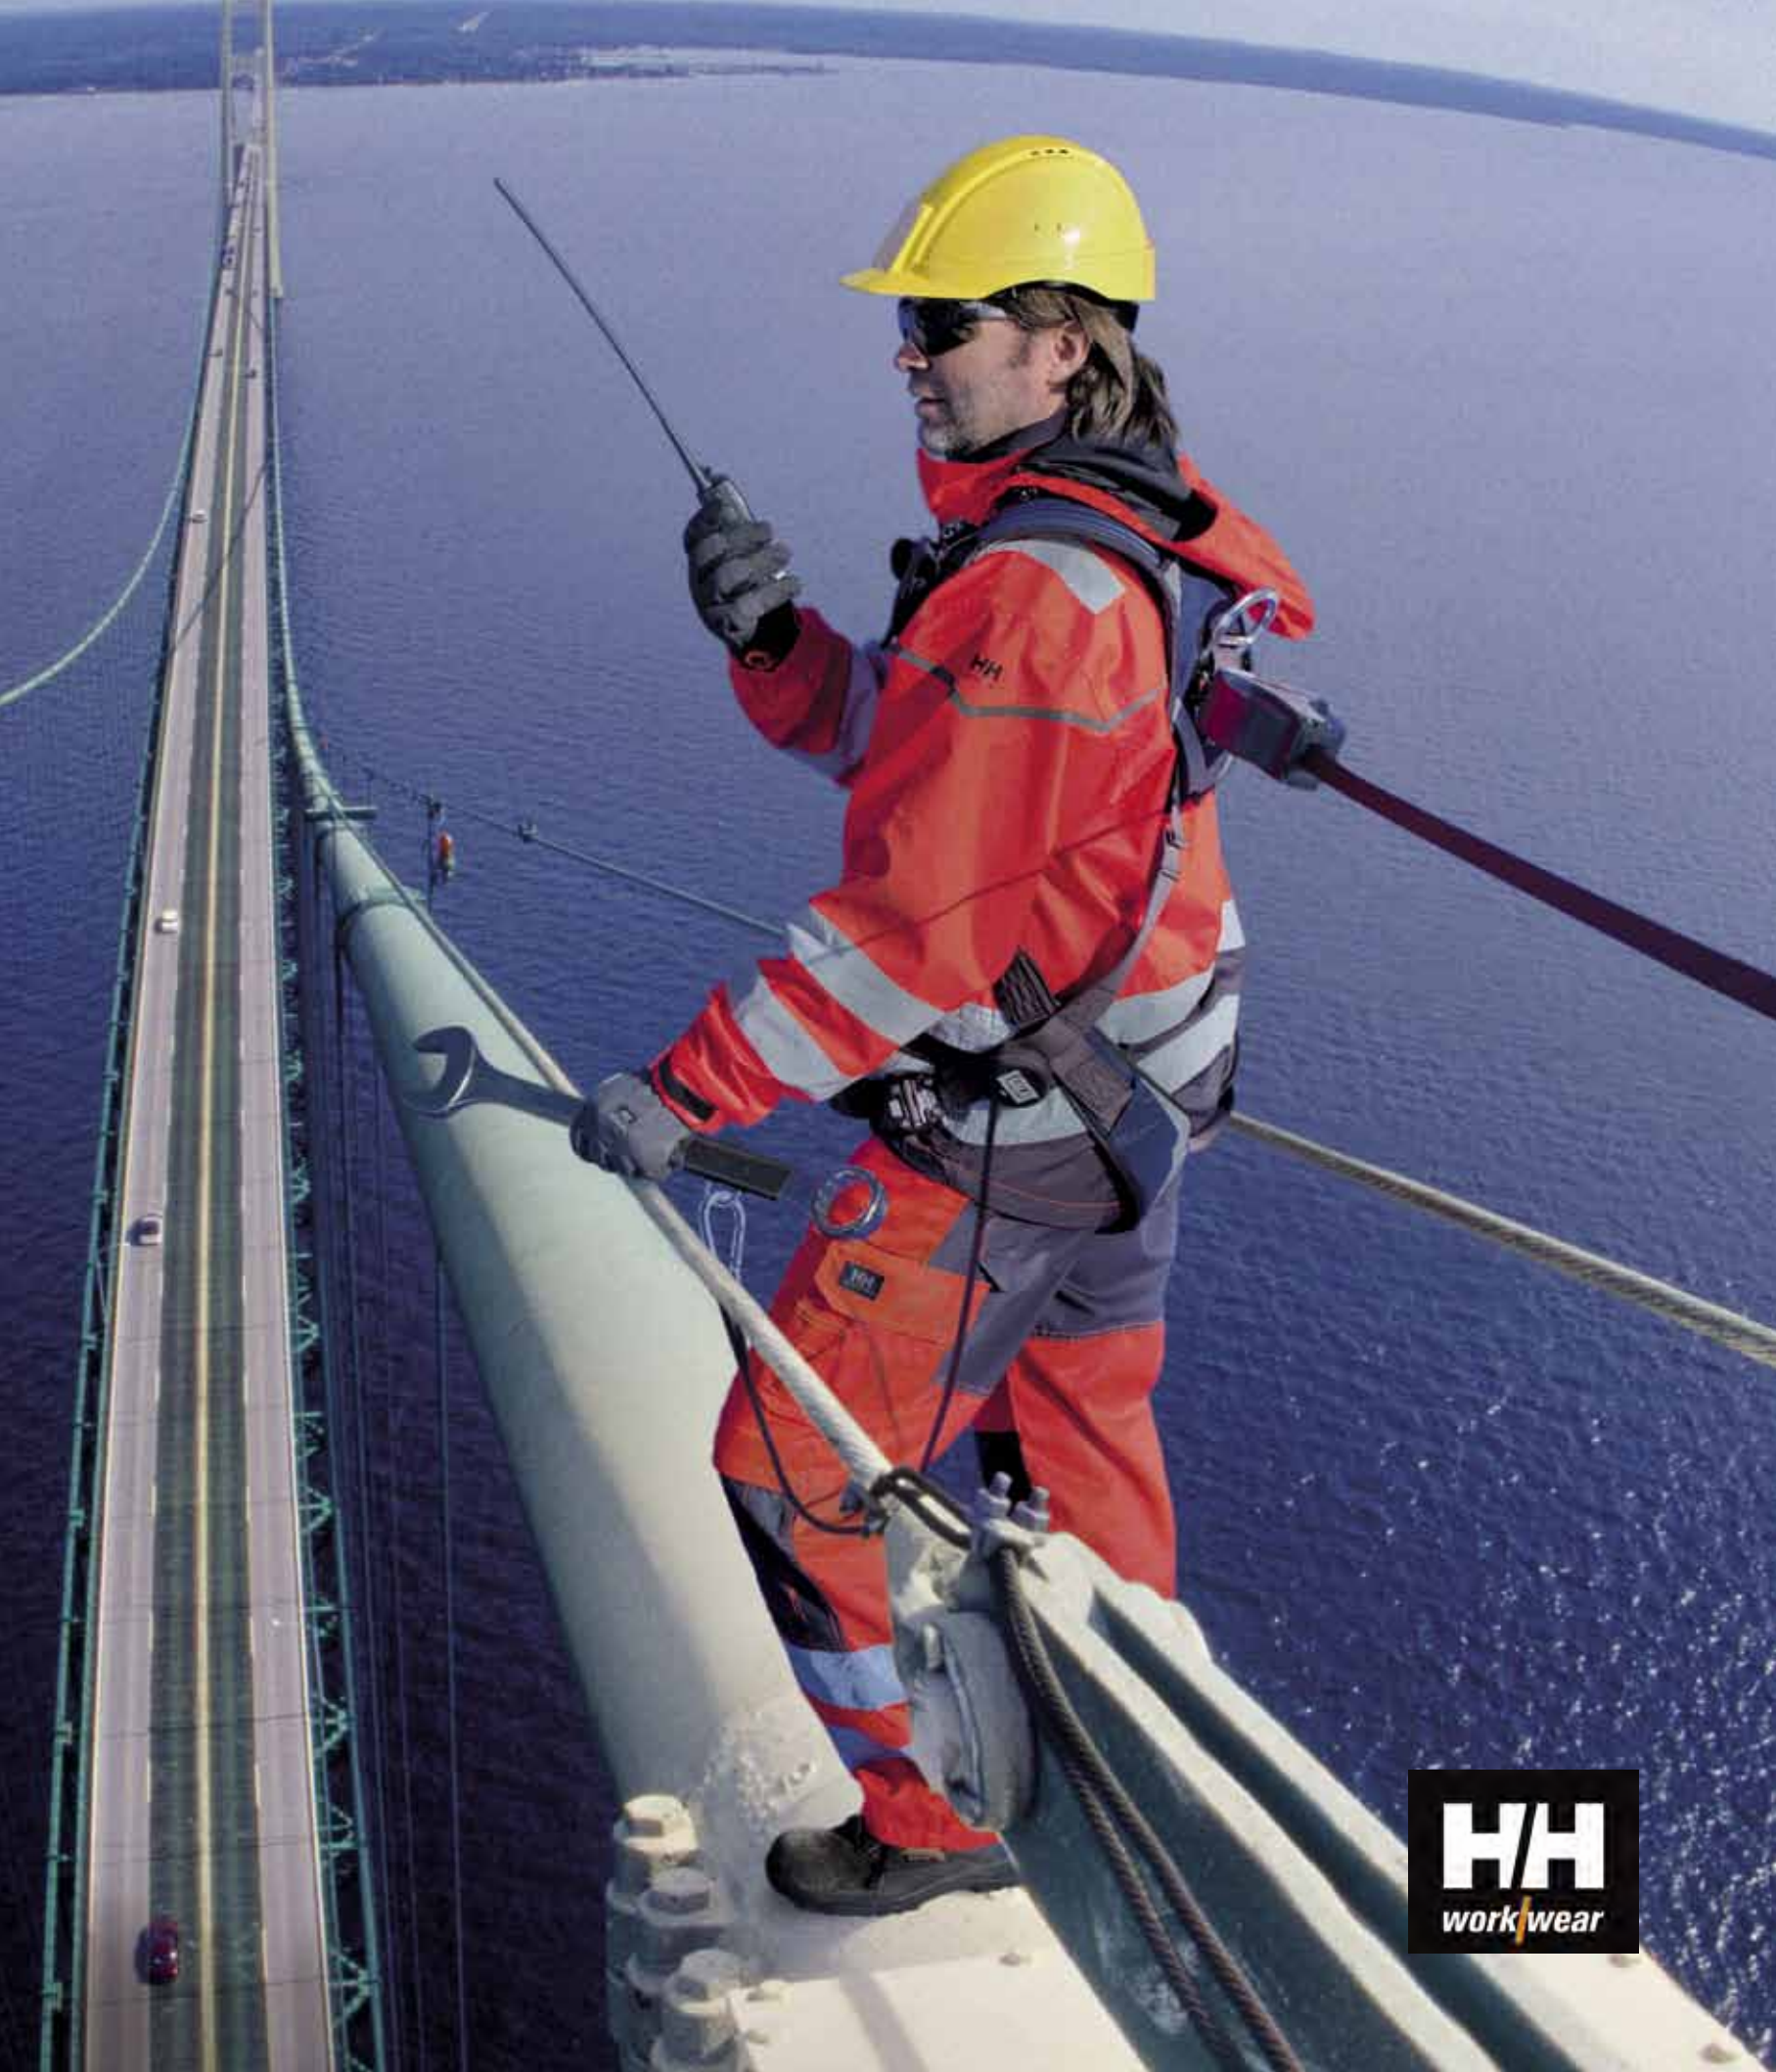

CONFIDENT  
WHEN IT  
MATTERS

An aerial photograph of a vast, snow-covered mountain slope. A prominent green metal catwalk structure, consisting of a main horizontal beam and several vertical support cables, stretches across the middle of the frame. The sky is a clear, pale blue, and the snow on the mountain has a soft, textured appearance. The overall scene conveys a sense of scale and ruggedness.

# HELLY HANSEN CATWALK

Scandinavian Design is the cornerstone in all Helly Hansen gear. The optimal combination of purposeful design, protection and style. This is why professional workers, mountain guides, ski patrollers and discerning enthusiasts choose Helly Hansen.

**CONFIDENT WHEN IT MATTERS**

# 1877

## HELLY HANSEN MILESTONES

**1877** Helly Juell Hansen treated his workwear with linseed oil to make it waterproof. It was a simple and functional innovation that was the first step in making clothes for the professional worker which were adapted to his needs.

**1878** Helly Hansen wins first prize for waterproof clothing for fishermen at the Paris Expo. Waterproof clothing had never been seen previously. The award was the first of many.

**1924** Helly Hansen launches Linox fabric. The material is watertight and shiny - without the stickiness of oil.

**1931** Helly Hansen launches Lin-å-lätt - a finer quality especially adapted for women.

**1932** Helly Hansen launches kapok lifejackets - a safe and comfortable invention which is a major step forward for safety at sea.

**1951** Helly Hansen discovers a new technique for seams: Microweld™, the first 100% waterproof seam is created.

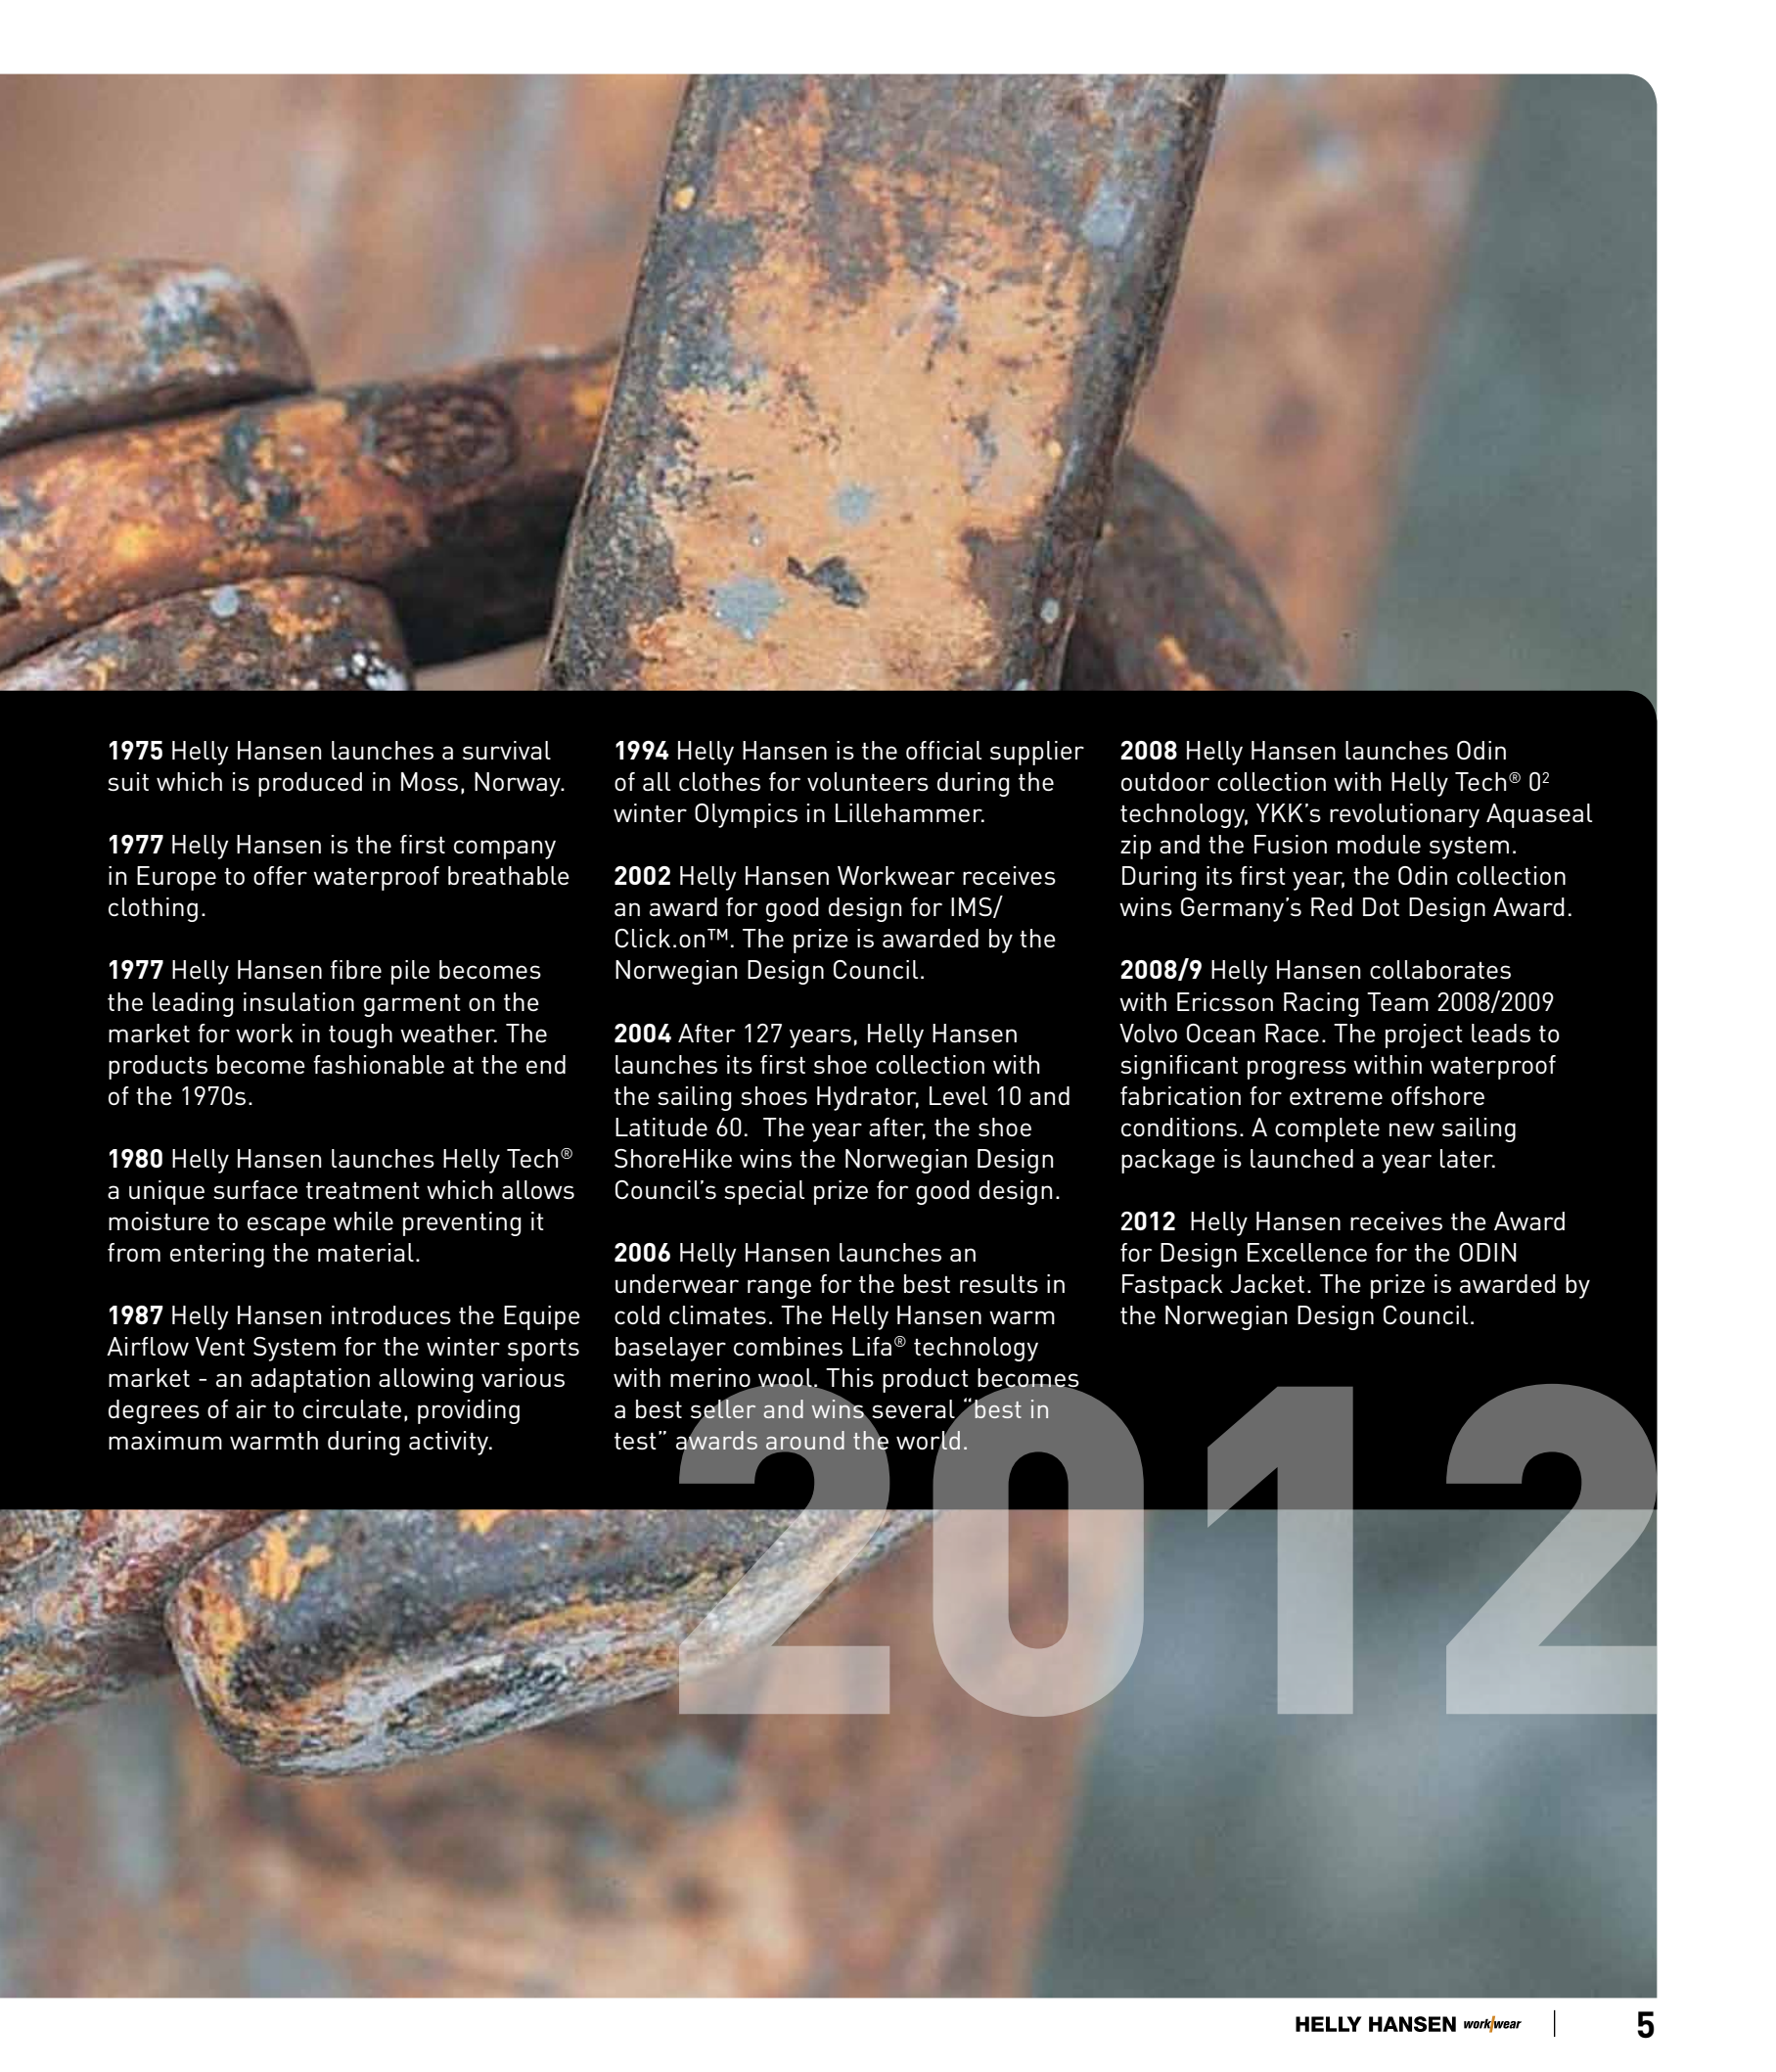

**1961** Helly Hansen starts working with fibre pile - a new method for knitting the fibers.

**1962** Helly Hansen invents Propile, the first ever fleece garment.

**1970** Helly Hansen begins experimenting with underwear - the true "three-layer system" is born.

**1972** Helly Hansen launches PVC-foam with closed cells for lifejackets. The foam is still used as flotation material 30 years later.

**1975** The launch of Lifa® - revolutionary, high performance sports underwear. A collection of polypropylene underwear which transports moisture away from the skin better than any other fabric.

**1975** Helly Hansen launches a survival suit which is produced in Moss, Norway.

**1977** Helly Hansen is the first company in Europe to offer waterproof breathable clothing.

**1977** Helly Hansen fibre pile becomes the leading insulation garment on the market for work in tough weather. The products become fashionable at the end of the 1970s.

**1980** Helly Hansen launches Helly Tech® a unique surface treatment which allows moisture to escape while preventing it from entering the material.

**1987** Helly Hansen introduces the Equipe Airflow Vent System for the winter sports market - an adaptation allowing various degrees of air to circulate, providing maximum warmth during activity.

**1994** Helly Hansen is the official supplier of all clothes for volunteers during the winter Olympics in Lillehammer.

**2002** Helly Hansen Workwear receives an award for good design for IMS/Click.on™. The prize is awarded by the Norwegian Design Council.

**2004** After 127 years, Helly Hansen launches its first shoe collection with the sailing shoes Hydrator, Level 10 and Latitude 60. The year after, the shoe ShoreHike wins the Norwegian Design Council's special prize for good design.

**2006** Helly Hansen launches an underwear range for the best results in cold climates. The Helly Hansen warm baselayer combines Lifa® technology with merino wool. This product becomes a best seller and wins several "best in test" awards around the world.

**2008** Helly Hansen launches Odin outdoor collection with Helly Tech® O<sup>2</sup> technology, YKK's revolutionary Aquaseal zip and the Fusion module system. During its first year, the Odin collection wins Germany's Red Dot Design Award.

**2008/9** Helly Hansen collaborates with Ericsson Racing Team 2008/2009 Volvo Ocean Race. The project leads to significant progress within waterproof fabrication for extreme offshore conditions. A complete new sailing package is launched a year later.

**2012** Helly Hansen receives the Award for Design Excellence for the ODIN Fastpack Jacket. The prize is awarded by the Norwegian Design Council.

## WHY DO MORE PROFESSIONALS CHOOSE HELLY TECH® WHEN FACING THE ELEMENTS?

Helly Tech® waterproof and breathable technology provides extreme protection in the harshest conditions. Whatever nature throws your way, the outer layer is what you depend on to keep you going. Many of our outer layer products use Helly Tech® and we sometimes combine Helly Tech® with other technologies to keep you dry, warm and confident in any conditions.

# WHY CHOOSE HELLY HANSEN BASELAYER?

**It's simply the best moisture management system in the world!**

## LIFA<sup>®</sup> STAY DRY TECHNOLOGY

Lifa<sup>®</sup> Stay Dry Technology<sup>™</sup> is the unique ingredient of all Helly Hansen baselayer. Continually perfected over the last 40 years, it is the best moisture management technology in the world.

## HH DRY EQUALS WARMER<sup>™</sup>!

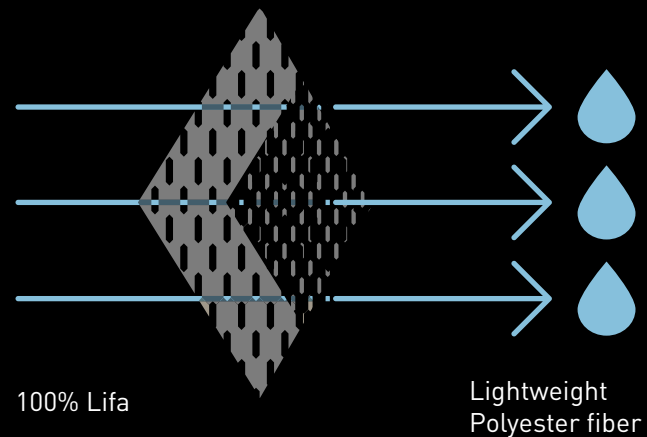

The key to staying warm, is keeping your skin dry. While traditional baselayer fibers hold moisture next to your skin, Lifa<sup>®</sup> Stay Dry Technology moves the moisture away from the skin, keeping you warm, dry and comfortable.

**HH<sup>®</sup>**  
*workwear*  
**COOL**

HH Cool is a versatile and stylish baselayer with a relaxed fit. Lifa<sup>®</sup> Stay Dry Technology ensures great performance and comfort all year round.

Lifa<sup>®</sup> Stay Dry Technology moves sweat away from the skin.

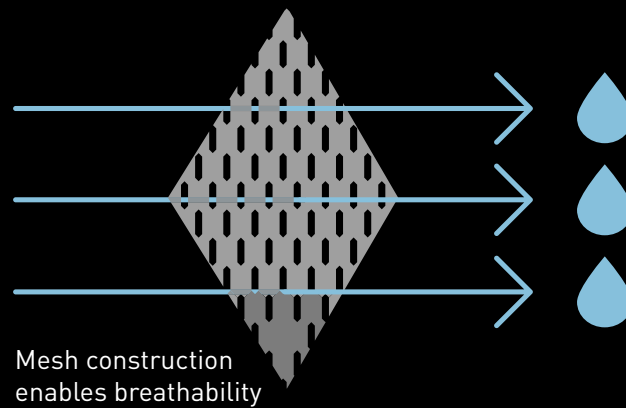

Polyester fibers spread the moisture to excellerate evaporation

**HH**<sup>®</sup>  
workwear  
**DRY**

HH Dry is a light weight baselayer, ideal for high intensity activities in mild to cold temperatures. No other baselayer transports sweat away from the skin better than Helly Hansen Dry.

Lifa® Stay Dry Technology moves sweat away from the skin.

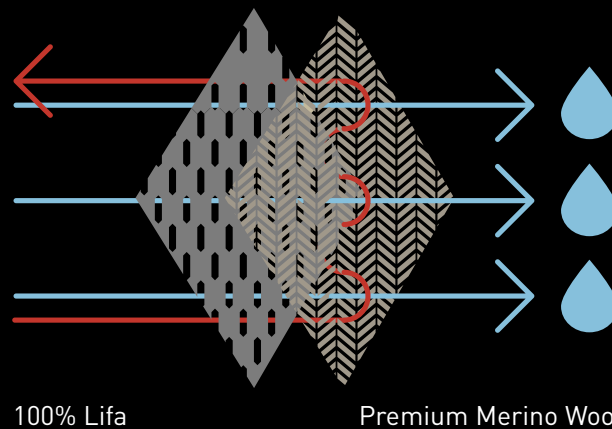

**HH**<sup>®</sup>  
workwear  
**WARM**

HH Warm combines Lifa® fiber technology T3 and merino wool, making it the ideal baselayer for all activities in cold weather.

Lifa® Stay Dry Technology moves sweat away from the skin.

Wool fibers capture warm air for insulation and excellerate moisture evaporation

## Helly Hansen and Tech Partners

### WARMER – DRIER – SOFTER – MORE COMPRESSIBLE

Exceptional soft and lofty warmth from ultra-fine synthetic fibers with a dryer sensation from special fiber treatment that keeps water from passing through the insulation.

PrimaLoft ONE: Ultra-fine microfiber making it extra warm, extra soft and extra lightweight.

PrimaLoft INFINITY: A continuous filament insulation that brings all the PrimaLoft benefits to stretch fabric garments.

PrimaLoft SPORT: Extra high loft for an easily recognizable warmth, softness and compressibility.

Warmcore by PrimaLoft: Ultra-fine microfiber properties, but without the special fiber treatment found in ONE, INFINITY and SPORT.

### FIBRE LOCK®

The double sided polyamide pile collects more air and increases insulation.

FibreLock® base fibre pile is exceptional for industrial use where hard wear decreases the lifetime of the garment.

### LIGHTWEIGHT BREATHABILITY AND WARMTH

Polartec® is the leading brand in high-performance light weight knit fleece fabrics that provide warmth, durability and light weight breathability. Made from 100% polyester velour, the construction creates air pockets that trap air and retain body heat.

Polartec® is Helly Hansen's main supplier of fleece materials and is used for a variety of styles made for versatile outdoor activities.

Polartec® and its fabrics are bluesign® and Öko-Tex certified.

### TOP QUALITY DOWN – NATURAL WARMTH – LASTING LOFT

Allied Feather & Down Corporation is a leader in quality and a reliable source for top quality, high fill power down and feathers. Allied products are bluesign® approved.

High quality European Down with outstanding warmth-to-weight ratio and unmatched long-lasting loft.

### CORDURA®

High durability CORDURA® Classic fabrics are the fabrics of choice for tough and rugged work conditions. Manufactured by authorised fabric producers, CORDURA® Classis fabric collections for workwear use high tenacity nylon 6.6 from INVISTA.

**CONFIDENT  
WHEN IT  
MATTERS**

---

As a Scandinavian company, we're extremely passionate about the outdoors, and we're committed to running an environmentally aware business. And while we've taken some significant and meaningful steps forward, we know that we can, and need to be better. Within a global economy, it can be difficult to understand the environmental impact of our choices, particularly around fabrics and materials. Things aren't always as they seem. Several years ago, we committed to working with bluesign® technologies ag to help guide us in our choices and to ensure we stay on the path toward an environmentally friendly business. The bluesign® represents the strictest standard for environmental sustainability in the global textile industry. You can learn more about the bluesign® standard at [www.bluesign.com](http://www.bluesign.com)

---

Helly Hansen fulfils all obligations regarding the EU REACH regulations.

# BRAND EMBELLISHMENT SOLUTION

Helly Hansen uses Avery Dennison's proprietary heat transfer portfolio, offering high-impact, versatile brand embellishments that will add value and increase appeal.

You can elevate your brand through inspired creative design

- Standout, photo-real images
- Embroidery effect transfers
- Flexible reflective solutions
- Anti dye migration.

Accelerate performance with easy to apply, easy to wear heat transfer solutions

- Proven, long-lasting durability
- Resistance to industrial and domestic laundering
- Easy, clean and efficient in-house application
- Öko-tex certified.

For more information on Avery Dennison Heat Transfer Embellishments, please contact your local Helly Hansen representative.

# TRADES MEN

OUR LONG EXPERIENCE  
IN COMBINATION WITH  
SCANDINAVIAN DESIGN  
IS THE BASIS ON WHICH  
WE CREATE FUNCTIONAL  
WORKWEAR FOR  
PROFESSIONALS.

#### **CHELSEA & WEST HAM COLLECTIONS**

Strong functional fabrics with new, fashionable design details in terms of colour and form. Inspired by the demands of a new generation of workmen.

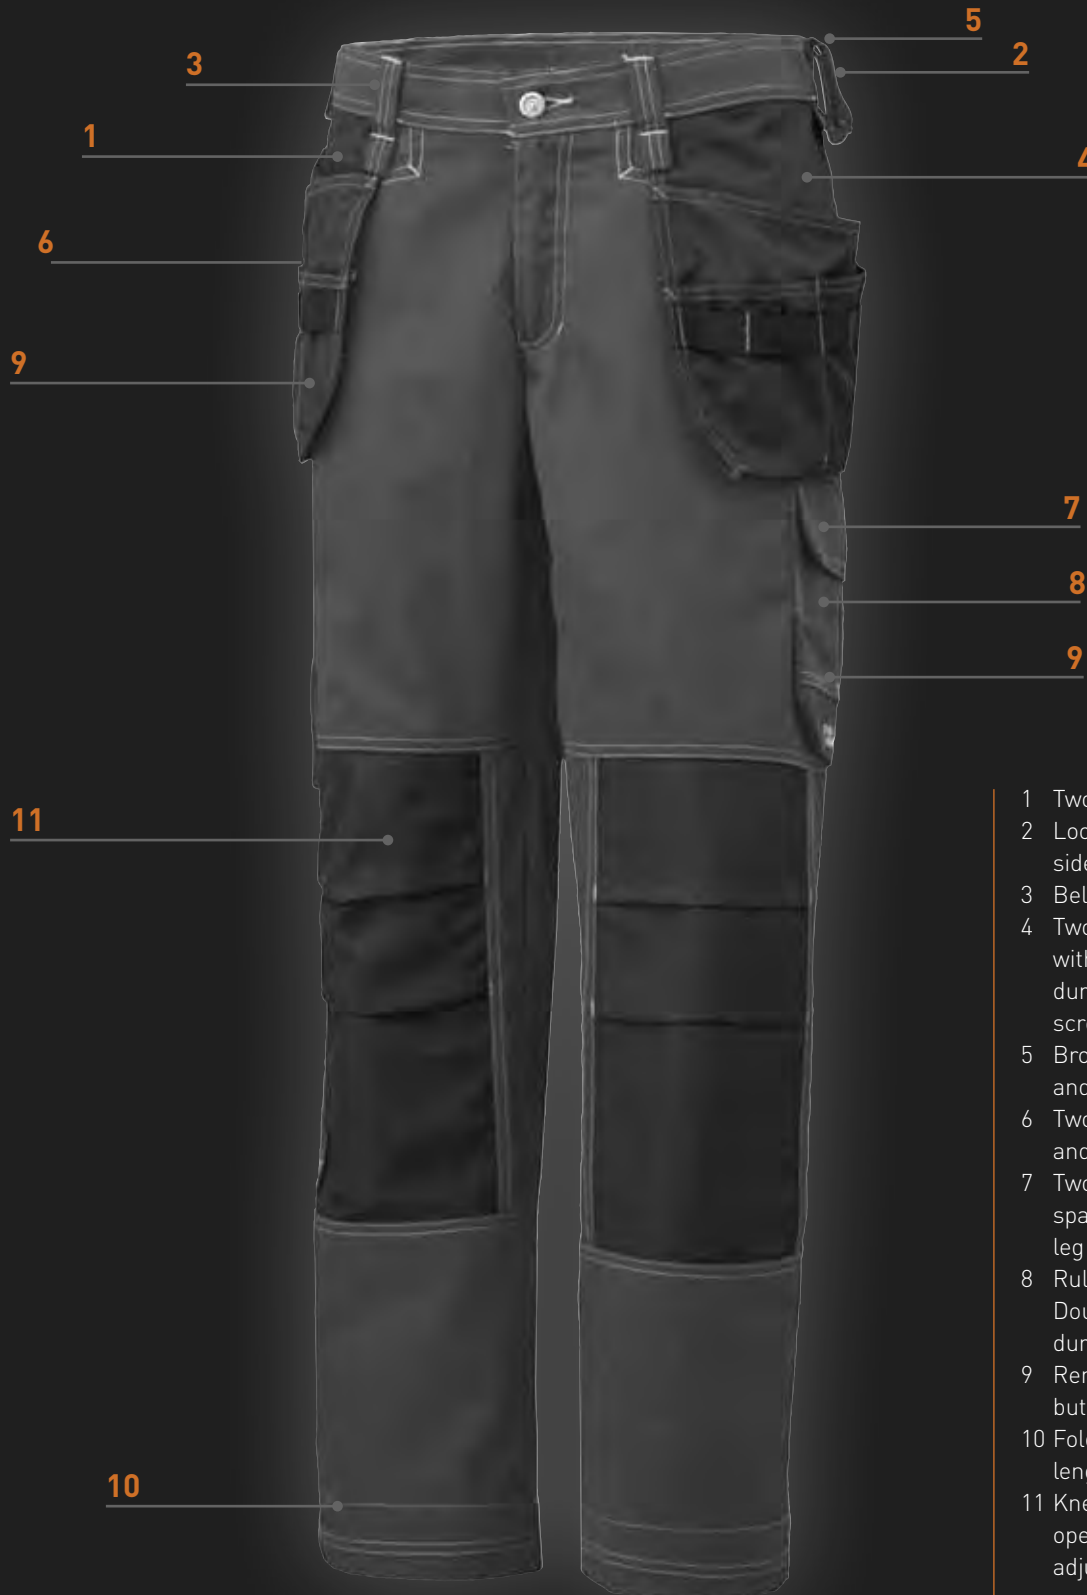

#### **ASHFORD COLLECTION**

High quality garments  
for professionals.

Our work clothes for workmen build on good design, durable fabrics and functional construction. This clothing should look good and be well-made. We have all the experience required to succeed with this, because since 1877 we have developed the best equipment for work, sport and survival.

New technology and Scandinavian design in combination with our long tradition and experience mean that as a professional user you can always be properly dressed in the workplace. We offer a collection with carefully chosen details and with solutions which are specially designed so that you can carry out all sorts of tasks, both indoors and outdoors.

# West Ham Construction Pant #76441

# PAINTER

“THE BATTLE COLLECTION IN COTTON IS SPECIFICALLY DESIGNED FOR PROFESSIONAL PAINTERS”

**BATTLE COLLECTION**

High quality cotton work clothes for professional painters.

Different industries require different types of solutions in terms of the function and design of work clothes.

At Helly Hansen, for many years we have been striving to understand our customers' needs and to come up with new solutions for them. We have now developed a special collection for professional painters and decorators.

The Battle Collection in cotton consists of jacket, vest, pant and shorts, and it has been developed with the professional painter in mind. With the specially designed pockets you can easily reach brushes, scrapers and all the other tools you have to carry with you. The knee pockets are reinforced with Cordura® which prolongs the durability of the garment. The ergonomic fit gives you great freedom of movement and the garment becomes much more comfortable to wear.

# INDUSTRY & SERVICE

“WE BELIEVE THAT APPEARANCE AND GOOD DESIGN ARE IMPORTANT FOR WORKWEAR WITHIN THE SERVICE SECTOR”

When it comes to work clothes within the service sector, appearance is even more important because this group is often the company's public face. Our clothes are cut and designed in the right way. They have a comfortable fit, long durability and protect you against wind and weather.

Many of the requirements for these garments are equal to those for clothes within industry. Helly Hansen Workwear manufactures garments which are adapted to the requirements of industry and service. With our long experience, we can offer clothes with special functions, such as good visibility, anti-static properties and flame retardancy - and of course our well-known high product quality!

“THE HELLY HANSEN  
THREE-LAYER SYSTEM  
IS THE PERFECT  
CHOICE FOR  
THE AGRICULTURAL  
AND FORESTRY  
INDUSTRY”

Those who work within agriculture and forestry know what a challenge it is to keep yourself warm and dry in different environments and varying weather conditions. It can be hard when you alternate between indoor and outdoor work, with constantly changing weather. This sort of problem is the perfect challenge for Helly Hansen's three-layer system.

Choose the right undergarment, an insulating middle layer and then durable, functional and attractive outer clothes - they are just as effective for gardeners as for forestry workers.

# FISHING

## **FISHING AND FOOD INDUSTRY COLLECTIONS**

Protection against bad weather. Sturdy woven PVC coated garments which are recommended for heavy wear situations. Resistant to fish oil, oil and concrete.

“OUR DEMANDS ON  
WATERPROOF GARMENTS  
ARE THREE TIMES  
STRICTER THAN THE  
INDUSTRY STANDARD”

In 1878, Helly Hansen won a prize at the international exhibition in Paris for its waterproof clothes for fishermen and sailors. We continue our collaboration with fishermen off Alaska, sailors in the Arctic and oil workers in the North Sea, and we have a single goal in sight: that we should always be their first choice when it comes to clothes for extreme conditions.

Our PVC and PU coated garments are designed to give the best freedom of movement in dangerous working conditions aboard fishing boats and other vessels. We choose materials which feel comfortable to the skin and which reduce condensation on the inside. The garments are resistant to water, cold, mildew and oil. All of our waterproof garments are EN certified. In the waterproof garment collection there are warning and flame retardant garments as well.

# HI VIS

## **BRIDGEWATER COLLECTION**

High quality visibility clothing.

## **LUDVIKA COLLECTION**

High quality visibility clothing - developed for the winter period. Combines with the Potsdam collection.

## **POTSDAM COLLECTION**

3 in 1 visibility clothing - for year-round use. Combines with the Ludvika collection.

## **WOLFSBURG COLLECTION**

Garments developed for electricians exposed to high risks. The ultimate garments for extreme weather conditions.

## **WATFORD COLLECTION**

Multi-functional flame retardant workwear for electricians and industry.

“WE MAKE SURE THAT YOU  
ARE VISIBLE WHEREVER  
YOU WORK - WITHIN THE  
EMERGENCY SERVICES,  
ON THE ROADS OR ON  
A BUILDING SITE”

Poor visibility is the cause of many accidents, both during the day and at night. Visible workwear is therefore an important part of your personal safety equipment and Helly Hansen Workwear offers a special collection of warning clothing for all affected professions.

Workwear in fluorescent material and with reflex stripes helps to protect you at work. Construction workers, road workers, airport workers, security guards and emergency services are just some of the groups that use EN 471 certified warning clothing from Helly Hansen Workwear.

# FLAME RETARDANT

“WE MAKE YOUR  
WORKING DAY SAFER  
WITH CLOTHES THAT  
PROTECT AGAINST  
NAKED FLAMES, HOT  
SURFACES AND  
RADIATION HEAT”

#### **HIMMELBJERG COLLECTION**

Protection against heat and flame. Materials, material combinations and clothes with limited flame spread.

#### **OBAN COLLECTION**

Flame retardant cotton clothing for offshore and oil work.

#### **WATFORD COLLECTION**

Multi-functional flame retardant workwear for electricians and industry.

#### **WOLFSBURG COLLECTION**

Garments developed for electricians exposed to high risks. The ultimate garments for extreme weather conditions.

#### **ROTHENBURG COLLECTION**

Garments developed for the chemical, oil and processing industries.

Heat resistant and flameproof workwear reduces damage and improves safety in the workplace. Helly Hansen Workwear has developed a comprehensive range of heat resistant clothing in all product categories.

We produce functional, flameproof workwear – from underwear to outer garments – regardless of whether you work in a factory, construction site or in a job where, for example, heat, electric arcs or static electricity pose a risk. Our flameproof clothing fulfils the requirements of European standards.

# OFFSHORE

“THE OFFSHORE  
INDUSTRY DEMANDS  
SAFETY, SAFETY AND  
EVEN MORE SAFETY.  
THE RIGHT WORKWEAR  
IS AN IMPORTANT PART  
OF WORK-RELATED  
SAFETY”

At Helly Hansen we agree with the oil companies that health, safety and the environment are extremely important. We want to take responsibility and make life on oil platforms safer and more comfortable, and this is why we have developed a collection of water and chemical resistant clothing. This also means that the user is more visible and is protected against heat, fire, wind and cold.

The right workwear protects and makes you visible while at the same time keeping you dry and warm. All of this reduces the risk of accidents and illness whilst at the same time making you feel comfortable in your clothing. More garments for offshore work can also be found in the catalogue under the headings HI-VIS, Survival and Fishing.

#### **ROTHENBURG COLLECTION**

Garments developed for the chemical, oil and processing industries.

#### **OBAN COLLECTION**

Flame retardant cotton clothing for offshore and oil work.

# SURVIVAL AND SAFETY

“NOBODY CAN GUARANTEE  
OUR LIVES BUT WE CAN  
GUARANTEE THAT OUR  
SURVIVAL AND SEA SAFETY  
PRODUCTS FULFIL  
THE STRICTEST  
REQUIREMENTS”

In 1932, Helly Hansen launched its first lifejacket, and since then we have been a leading actor in developing life saving equipment. We are taking this tradition further with a wide range of survival suits, lifejackets, flotation suits and other suits for special purposes.

We make daily work safer, simpler and more comfortable for those who work at sea under extreme weather conditions, on offshore installations, in the search and rescue services and aboard fishing boats and other vessels. We produce life saving equipment and survival suits which give optimum buoyancy and protect against hypothermia.

## 78855 DELTA INFLATABLE 150N HR

LIFEJACKET

COLOURS: 290 DARK ORANGE

SIZES: ONE SIZE

# 3 LAYER SYSTEM™

“WE HAVE DEVELOPED A  
3 LAYER SYSTEM™  
WHICH GIVES COMFORT  
WHEN YOU ARE  
EXPOSED TO COLD, WIND,  
RAIN AND SNOW IN THE  
WORLD’S TOUGHEST  
WORKPLACES”

Helly Hansen invented the 3 layer system™ which keeps you dry, warm and safe while you work - even when you are exposed to extreme cold, wind or rain. The base layer, insulation layer and protective layer work together to create an optimum combination of insulation, ventilation and protection against wind, wet and cold.

For generations, workmen, forestry workers, fishermen and others who work in the Scandinavian climate have helped us to develop workwear. This has made us one of the world leaders in the field with the help of technology like HELLY TECH®, waterproof clothing that breathes, plus the internationally famous LIFA® products which keep you warm and dry even in the most difficult weather conditions.

**LIFA® DRY**

For working in all conditions.  
Keeps you dry and comfortable.

**LIFA® COOL**

Base layer. Loose fit. For working in all weather. Keeps you dry and extra comfortable.

**LIFA® WARM**

For working in cold climates.  
Keeps you dry and warm.

# 3 LAYER SYSTEM

## Build your own comfort zone

HELLY HANSEN INVENTED THE SO-CALLED THREE-LAYER SYSTEM™ WHICH KEEPS YOU DRY, WARM AND SAFE WHILE YOU WORK - EVEN WHEN YOU ARE EXPOSED TO EXTREME COLD, WIND OR RAIN. THE BASE LAYER, INSULATION LAYER AND PROTECTIVE LAYER WORK TOGETHER TO CREATE AN OPTIMUM COMBINATION OF INSULATION, VENTILATION AND PROTECTION AGAINST WIND, WET AND COLD.

For generations, workmen, forestry workers, fishermen and others who work in the Scandinavian climate have helped us to develop workwear. This has made us one of the world leaders in the field with the help of technology like HELLY TECH®, waterproof clothing that breathes, plus the internationally famous LIFA® products which keep you warm and dry even in the most difficult weather conditions.

### SAFE.

The Helly Tech® protective layer keeps out wind, rain and snow and at the same time transports moisture away from your body. Our range of third layer garments includes warning clothing, flameproof clothing and other outer garments which are designed to keep you safe and comfortable at work.

### WARM.

Helly Hansen's Fibre Pile® and Crafter Fleece™ retain an air layer, give good ventilation and transport moisture away from your body. The insulation layer is designed to keep the right body temperature and give optimum comfort.

### DRY.

LIFA® Stay Dry Technology™ is world famous as the best choice when you need underclothes which keep you dry and warm in all weathers, since moisture and excess heat are transported away from the body.

NEW PRODUCT

HELLYTECH®

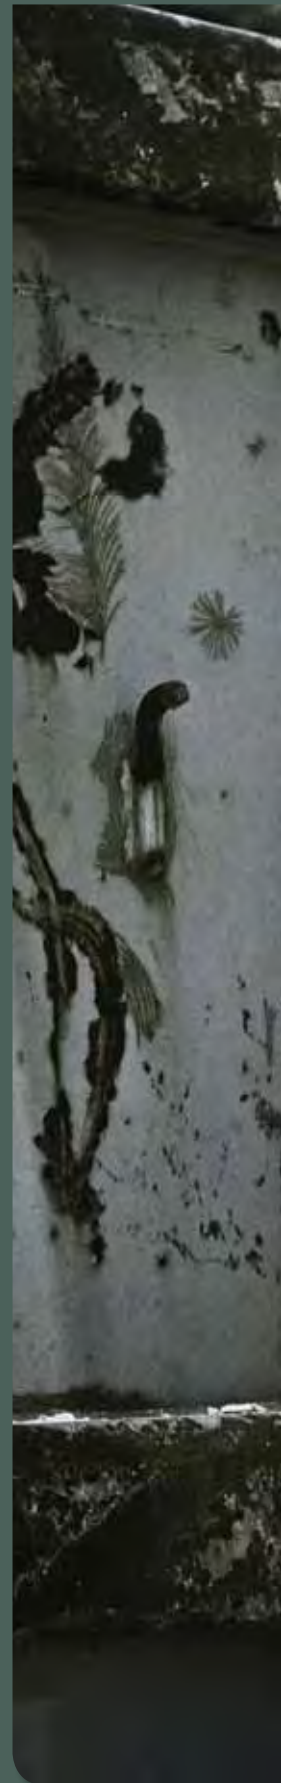

“KEEP YOUR EYES  
OPEN FOR NEXT  
SEASON’S DESIGN  
FROM HELLY HANSEN  
WORKWEAR”

Our profile range is focused on tops, sweaters and jackets. These products are a combination of great materials and good design which makes it possible for you to wear Helly Hansen even away from the workplace.

The range includes seasonal garments which are renewed with new fashionable designs from season to season. These products are often sold for a short period and are therefore presented in a separate catalogue. Contact your local reseller for more information on the latest new products.

# WOMEN

“WE HAVE STARTED  
DEVELOPING CLOTHES  
THAT WILL MEET  
WOMEN’S SPECIFIC  
REQUIREMENTS IN  
TERMS OF FIT,  
FUNCTION AND  
APPEARANCE”

At Helly Hansen Workwear we are always striving to find out more about our customers’ needs. We do this by meeting our customers, and by carrying out tests and market research. For three years, we have been involved in a research project targeted at workwear for women. The project is administrated by the Norwegian State consumer research Institute.

Even now, our designers are creating a women’s collection of attractive garments with a practical fit. We have already released a number of products, but we will be continuing to develop and broaden our range.

**ASHFORD COLLECTION**

High quality garment  
for professionals.

**BRIDGEWATER COLLECTION**

High quality visibility clothing.

## 71120 W TØNSBERG JACKET

HELLYTECH

COLOURS: 169 EN 471 RED/CHARCOAL, 265 EN471 ORANGE/NAVY, 369 EN471 YELLOW/CHARCOAL

SIZES: S-2XL

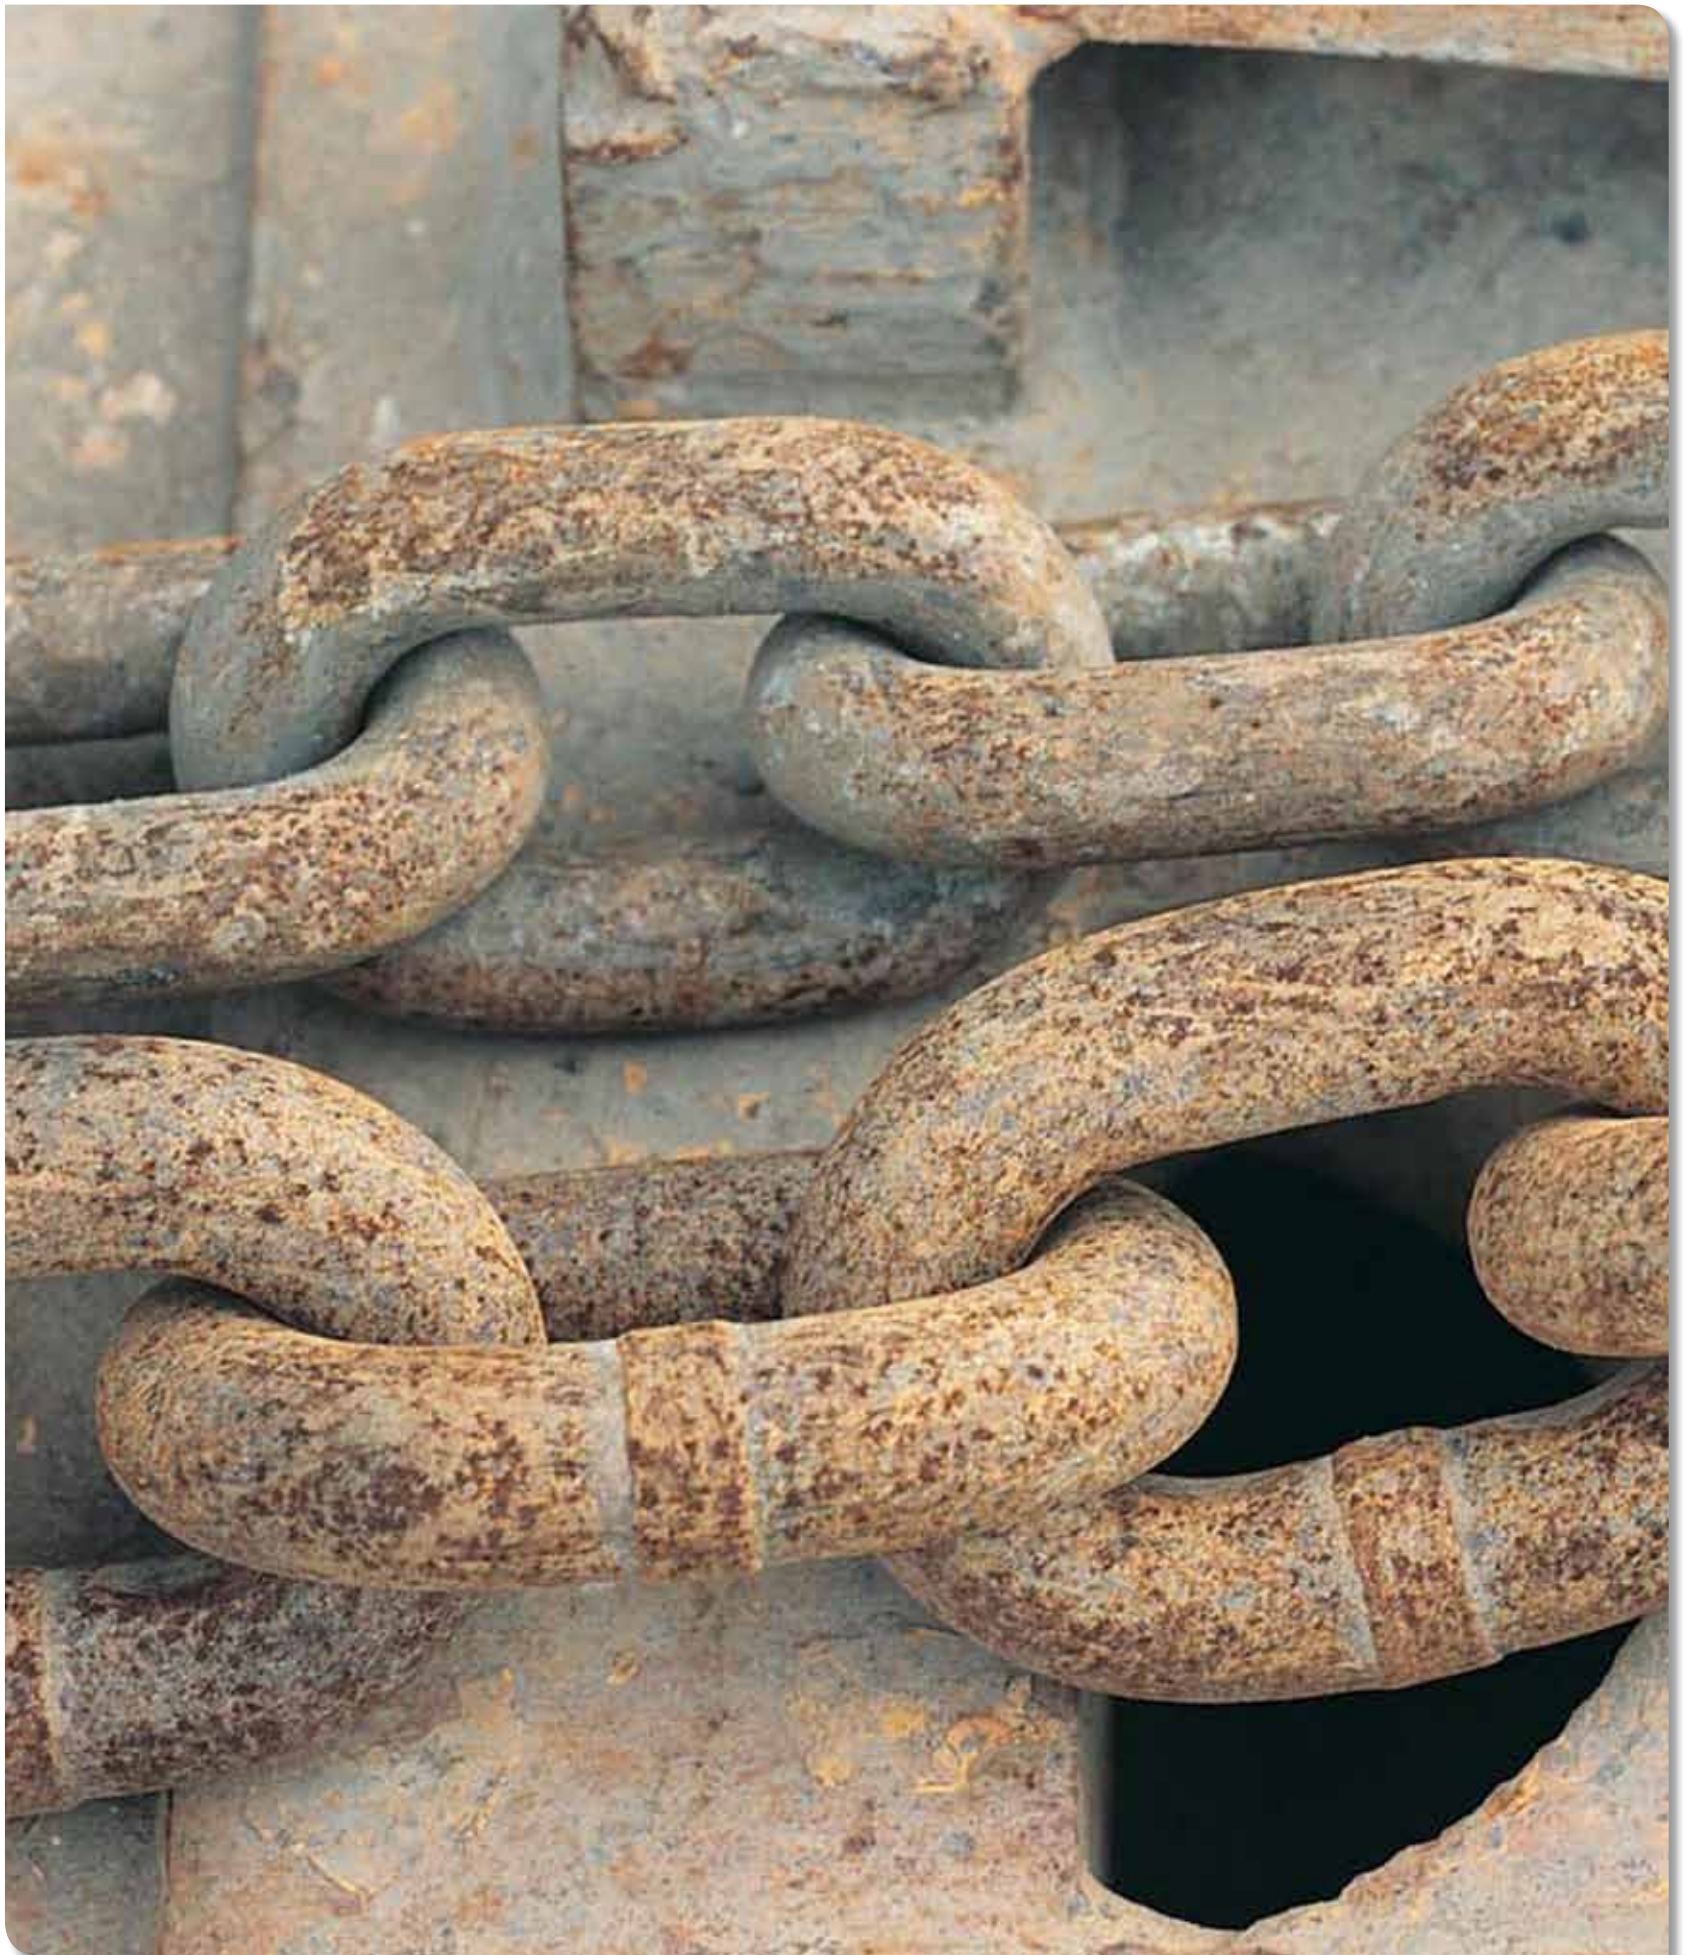

FABRIC: Contrast color: 100% Nylon Oxford, PU coated - 140 g/m<sup>2</sup>; EN 471 color: 100% Polyester, PU coated - 200 g/m<sup>2</sup>

- EN471, Class 2
- Helly Tech® - waterproof/breathable
- Brushed polyester inside collar
- Lining: 100% Polyester mesh
- Reflex at waist, sleeves and shoulders
- Water repellent front zipper with inner placket
- Detachable hood with draw cord and velcro adjustment
- Two chest pockets with water repellent zippers
- Two pockets with flaps and velcro closure
- Draw cord adjustment at hem w/ button-up option for safety
- Elastic cuffs with velcro adjustment

- Click.on™ loops for accessories under pocket flaps
- Zipper inside for logo applications
- Chin guard

“WE HAVE STARTED  
DEVELOPING  
CHILDREN’S CLOTHES -  
SO THAT JUNIOR  
CAN WEAR  
CLOTHES THAT  
ARE JUST AS GOOD AS  
MUMMY AND DADDY”

We are continuously trying to push boundaries and develop products which keep Helly Hansen Workwear at the forefront of development.

We have made high demands in terms of durability and comfort on the garments we develop today, which means that they meet children’s needs for attractive and durable clothing. We know that children test our garments to the limit, and that seams and fabric have to stand up to tough challenges.

# CHILDREN

## **CHELSEA COLLECTION**

Strong functional fabrics with new, fashionable design details in terms of colour and form.

## **LUDVIKA COLLECTION**

Professional Helly Tech® clothing for children.

## 72152 CHELSEA JR JACKET

PILE

COLOURS: 990 BLACK

SIZES: 104-140

FABRIC: 100% Polyester - 360 g/m2

- W-pile Fiber Lock
- Front zipper
- No shoulder seams
- Hood
- Two pockets at front with zippers
- Elastic at waist and cuffs
- Pile inside

990

## 76445 CHELSEA JR CONSTRUCTION PANT

POLYESTER/COTTON

COLOURS: 999 BLACK/CHARCOAL

SIZES: 104-140

FABRIC: 79% Cotton / 21% Polyester - 295 g/m2

- Reinforcement at the knees
- Reinforcement: 100% Polyamide - 195 g/m2
- Fly with zip
- Ruler pocket
- Thigh pocket with flap
- Two back pockets, one with flap, velcro closure and reflex piping
- Two hanging front pockets
- Two pockets at front

990

## 71600 LUDVIKA KIDS SUIT

HELLYTECH

COLOURS: 369 EN471 YELLOW/CHARCOAL

SIZES: 104-140

FABRIC: Contrast color: 100% Nylon Oxford, PU coated - 140 g/m2 ; EN 471 color: 100% Polyester, PU coated - 200 g/m2

- Helly Tech® - waterproof/breathable
- Brushed polyester inside collar
- Insulation: 100% Polyester - 120 g/m2 in body, 80 g/m2 in sleeves
- Lining: 100% Nylon
- Reflective details
- Reflex at waist, sleeves and legs
- Detachable hood
- Elastic at hood
- Two back pockets with flaps
- Two pockets at front with zippers and flaps
- Elastic at hem of leg
- Elastic at waist
- Elastic cuffs with velcro adjustment
- Rubber foot straps (+ one additional set of rubber straps)
- Double storm flap with zipper and velcro closure

# GLOVES

“WE DEVELOP GLOVES  
THAT PROVIDE COMFORT  
AND GOOD GRIP WHILST  
PROTECTING  
YOUR MOST IMPORTANT  
TOOL - YOUR HANDS”

Comfort is important when you choose gloves, but it's even more important that you protect your hands against injury. Helly Hansen Workwear offers a wide range of gloves in a number of functional models for different types of work.

Our focus is on good grip and freedom of movement so that you can carry out your work in a simple manner while protecting your most important tool - your hands. Our range includes gloves that protect you against chemicals, heat and cold, and against fire, cuts and crush injuries.

## 79620 PARIS GLOVES

LINED

COLOURS: 979 DARK GREY/BLACK

SIZES: 8, 10, 12

FABRIC: Lined neoprene gloves ; Vinyl nobs for good grip

- Thinsulate lining Comfortable and warm
- Delivered in packages of 6 pairs

979

APPROVALS:

CE. CAT. 1

## 79613 CHAMONIX GLOVES

LINED

COLOURS: 999 BLACK/GREY

SIZES: 8, 9, 10, 11, 12

FABRIC: Microthar/Polyester

- Water resistant
- Curved fingers
- Reinforced index finger and seams
- Velcro adjustment at cuffs
- Delivered in packages of 6 pairs
- For building and construction work in cold environments
- Silicone and chromium free
- Washable at 40\_C

999

APPROVALS:

CE. CAT. 2

## 79612 MARSEILLE GLOVES

UNLINED

COLOURS: 999 BLACK/GREY

SIZES: 8, 10, 12

FABRIC: Microthar/Polyester

- Curved fingers
- Reinforced index finger and seams
- Velcro adjustment at cuffs
- Delivered in packages of 6 pairs
- Silicone and chromium free
- Washable at 40\_C

999

APPROVALS:

CE. CAT. 2

## 79622 LYON GLOVES

UNLINED

COLOURS: 990 BLACK

SIZES: 8, 10, 12

FABRIC: Cotton gloves coated with nitrile rubber ; Good grip

- Protection against puncture and certain chemicals
- Protection in demanding environments and elements such as oil and hydrogen
- Delivered in packages of 12 pairs

APPROVALS:

CE. CAT. 2

990

## 79621 NICE GLOVES

UNLINED

COLOURS: 999 BLACK/GREY

SIZES: 8, 10, 12

FABRIC: 100% Nylon, PU coated

- Protection against oil and certain chemicals
- Protection against puncture
- Delivered in packages of 12 pairs
- Great for assembly / coating / industrial work
- Silicone and chromium free
- Washable at 40\_C

APPROVALS:

CE. CAT. 2

“ADAPT YOUR  
WORKWEAR  
WITH ACCESSORIES  
THAT FIT THEIR  
FUNCTION”

We know that professionals want to perform at their best. This is why we offer a wide range of accessories that supplement your Helly Hansen workwear. Especially designed pockets and holders that increase function and flexibility. Knee pads that provide comfort and prevent injury. Gloves and caps that protect against wind and weather.

The right accessories increase functionality. This is why our demands on material and function are just as high when developing accessories.

# ACCESSORIES

## 79560 TROLLEY BAG 95L

COLOURS: 990 BLACK

SIZES: ONE SIZE

FABRIC: 100% Nylon

- Water resistant
- One large compartment with two-way zipper
- One outside pocket with zippers, accessible both from the inside and the outside
- One outside zipper pocket
- Extendable handle
- Carry handle

## 79830 WW BEANIE

COLOURS: 130 Helly Hansen RED (SPORT), 290 DARK ORANGE, 970 DARK GREY, 990 BLACK

SIZES: ONE SIZE

FABRIC: 30% Wool / 70% Acrylic

- Lined with micro fleece
- Delivered in packages of 5 pcs

## 79840 EAR PROTECTION BEANIE

COLOURS: 130 Helly Hansen RED (SPORT), 290 DARK ORANGE, 970 DARK GREY, 990 BLACK

SIZES: ONE SIZE

FABRIC: 30% Wool / 70% Acrylic

- Delivered in packages of 5 pcs

## 79823 BLACKPOOL HAT

COLOURS: 590 NAVY

SIZES: ONE SIZE

FABRIC: 50% Wool / 50% Acrylic

- Gore wind stopper lining

## 79831 ALASKA HAT

COLOURS: 990 BLACK

SIZES: M, L, XL

FABRIC: 100% Polyamide, PU coated - 250 g/m2

- Lining: Synthetic fur and quilted polyester
- Small pocket on the left side
- Chin strap

## 79810 HAGFORS HOOD

COLOURS: 990 BLACK

SIZES: 57/58, 63/64

FABRIC: 100% Polyester, PU coated - 140 g/m2

- Helly Tech® - waterproof/breathable
- Lining: 100% Polyester fleece, 320 g/m2
- Adjustable strap with buckle at back
- Draw cord adjustment at hem

## 79310 MIDLAND GLOVES

COLOURS: 990 BLACK

SIZES: 7, 8, 9, 10

FABRIC: 100% Polyester \_ Crafter Fleece™ - 320 g/m2

- Leather imitation on the palm of the glove

990

## 72371 OLTEN MITTENS

COLOURS: 590 NAVY

SIZES: 8, 10

FABRIC: 100% Polyester - 360 g/m2

- W-pile
- PVC reinforcement on the palm of the glove
- Pile inside

590

## 72464 BURGDORF STOCKINGS

COLOURS: 590 NAVY

SIZES: 36-37, 46-47

FABRIC: 100% Polyester - 360 g/m2

- W-pile
- Pile inside

590

## 79540 HAMMER HOLDER

COLOURS: 990 BLACK

SIZES: ONE SIZE

FABRIC: Aluminium

990

## 79541 HAMMER HOLDER STRAP

COLOURS: 990 BLACK

SIZES: ONE SIZE

FABRIC: 100% Heavy polyester

- Velcro closure

990

## 79529 DRILL POCKET

COLOURS: 980 CHARCOAL

SIZES: ONE SIZE

FABRIC: 100% Heavy polyester

- Velcro adjustment
- Click.on™ accessories

980

## 79515 NAILS/SCREWS POCKET

COLOURS: 980 CHARCOAL

SIZES: ONE SIZE

FABRIC: 100% Heavy polyester

- One large compartment and 3 outside pockets
- 12 x 9 cm

980

## 79508 MOBILE PHONE POCKET

COLOURS: 980 CHARCOAL

SIZES: ONE SIZE

FABRIC: 100% Heavy polyester

- Mobile phone pocket with flap
- 15,5 x 8 cm

980

## 79520 ID CARD HOLDER VERTICAL

COLOURS: 990 BLACK

SIZES: ONE SIZE

FABRIC: 100% Heavy polyester ; Lightweight plastic

- Suitable for standard sized credit- and identification cards

# CE-MARKING

## **THE CE MARKING INDICATES COMPLIANCE WITH THE ESSENTIAL REQUIREMENTS FOR HEALTH AND SAFETY ON THE BASIS OF EU DIRECTIVE (89/686/EEC)**

Helly Hansen workwear's ppe products are manufactured and tested in accordance with the standards which support European Directive (89/686/eec) and are therefore approved in accordance with CE marking regulations.

Helly Hansen workwear is intended to prevent accidents and injuries during work on exposure to cold, heat, fire, rain and in limited visibility.

The CE marking refers to a safety level on the product. European Directive (89/686/eec) is the applicable law for the European member states on the issue of personal protective equipment (ppe). European Directive (89/686/eec) states as a basic requirement for design and manufacture that ppe is used to make working conditions safer.

### **PRODUCT CHARACTERISTICS.**

The CE marking means that the product fulfils the requirements for the relevant product category. This implies no guarantee that the product will prevent accidents or serious injuries if the user is exposed to such risks in a work environment.

### **PPE DIRECTIVE 89/656 FOR END USERS**

End users must refer to directive 89/656/EEG for the assessment of health and safety at work. The employer must carry out a risk assessment and decide on the right protective equipment for their individual work environment. Employers are responsible for suitable personal protective equipment being available to personnel.

A summary follows below of European (EN) standards which are followed by Helly Hansen Workwear. For complete information about CE marking, please contact your local authorities.

The specified test results are given as a symbol on the product. Either it is indicated that the measurement took place according to the prescribed methods or that the result is 1, 2 or 3 where 3 is the highest protection level.

Data for each Helly Hansen product is presented on the inside label and in brochures attached to the garments. This information is also provided in the product descriptions in this brochure, and at [hhworkwear.com](http://hhworkwear.com).

## EN 342

**Protective clothing. Ensembles and garments for protection against cold.**

The standard specifies test methods and requirements of functional properties in garments which intended to protect against cold (air temperature below -5 °C). Helly Hansen has tested its products according to method B, which means that the insulation (X) has been measured for a garment combination (jacket/pant or coveralls) with a base layer. In addition, air permeability (Y) is measured.

**X (B) - thermal insulation**  
**Y - air permeability class (classes 1-3, where class 3 protects best against wind)**

## EN 343

**Protective clothing: Protection against rain**

This standard specifies requirements and test methods applicable to materials and seams of protective clothing against the influence of precipitation (e.g. rain, snowflakes), fog and ground humidity at temperatures down to 5° C. The garment is tested regards to waterproofness (X) and water vapour resistance (Y)

**X - Resistance to water penetration, level 1, 2 or 3 (where 3 protects best against rain)**  
**Y - Water vapour resistance, level 1, 2 or 3 (level 3 most permeable)**

## EN 471

**Protective clothing. High-visibility warning clothing for professional use**

The standard specifies requirements for clothing intended to make the person visible in dangerous situations regardless of lighting conditions, during the day as well as at night in the beam of headlights or other artificial lighting (24 hour visibility). Effective visibility is achieved with fluorescent fabrics and reflex stripes. Visibility is measured as a combination of the area and placing of the retro-reflective material and the fluorescent material (X), and the quality of these (Y).

**X Area of retro-reflective/ fluorescent fabric**  
**level 1, 2 or 3**  
**Y Retro-reflective material**  
 quality 1 or 2

## EN 531

**Protective clothing for industrial workers exposed to heat (excluding firefighters' and welders' clothing)**

The standard specifies the requirements of the properties of protective clothing which implies exposure to heat. Limited flame spread (A) (pass/fail) is tested according to a method which is given in EN 532. To fulfil the requirements in EN 531, the clothes must also protect against at least one form of heat. The heat can be conveyed through convection B (levels B1-B5) according to EN 367, through radiation C (levels C1-C4) according to EN 366, or splashes from melted aluminium (D) according to EN 373. Helly Hansen products which are tested according to EN 531 are exposed to heat through radiation and convection.

## EN 533

**Protective clothing. Protection against heat and flame. Limited flame spread materials and material assemblies**

The standard specifies requirements for the limited flame spread properties of materials and material assemblies used in protective clothing. The material is classified according to an index which indicates the limit of flame spread (X) before and after standard washing procedure (Y, Z).

**X/Y/Z - flame spread index (1,2 or 3) after number washes (Y) at temperature (Z)**

Index 1 materials should only be used as part of an index 2 or 3 material assembly and should not be worn next to skin.

## EN 1149

**Protective clothing. Electrostatic properties.**

EN 1149 covers the requirements of properties and test methods for measurement of protection against static electricity and the discharge process.

EN 1149-1 specifies requirements and test methods for materials intended to be used in the manufacturing of electrostatic dissipative protective clothing (or gloves) to avoid incendiary discharge.

EN 1149-2 specifies a test method for measuring the electrical vertical resistance of protective clothing materials- This European standard is not applicable for specifying protection against mains voltages.

EN 1149-3 specifies methods for measuring the dissipation of electrostatic charge from the surface of materials for garments. This test method is applicable to all materials, including homogeneous materials and inhomogeneous materials with surface conducting fibres and core conducting fibres.

EN 1149-5 specifies material and design requirements for electrostatic dissipative protective clothing, used as part of a total earthed system, to avoid incendiary discharges. The requirements may not be sufficient in oxygen enriched flammable atmospheres. This European standard is not applicable for protection against mains voltages. The material must meet the requirements set out in EN 1149-1 or -3.

## EN 470-1

**Protective clothing for use in welding and allied processes. Part 1 : General requirements**

This part of this European standard specifies test methods and general performance requirements for protective clothing for operators engaged in welding and allied processes with comparable risks. The garment is intended to protect against splashes of molten metal (EN 348), short contact with flames (EN 532) and ultraviolet radiation, plus use for up to eight hours at ambient temperature.

## EN 61482-1-2:2007

**Live working. Protective clothing against the thermal hazards of an electric arc. Part 1-2: Test methods – Methods 2: Determination of arc protection class of material and clothing by using a constrained and directed arc (box test).**

This part of this standard specifies methods to test material and garments intended for use in heat- and flame-resistance clothing for workers exposed to electric arc. The test is intended to simulate an accident with an electric arc in a low voltage installation. The material test is used to determine thermal insulation and risk of skin injury, and to ensure that the garment can still be used after these tests. Both material and garment tests are carried out in low voltage installations (400 VAC).

The duration of the electric arc is 500 ms and the current strength used is 4 KA for class 1 and 7 KA for class 2 protection.

## EN ISO 11612

**Protective clothing. Clothing to protect against heat and flame**

This standard specifies performance requirements for garments made from flexible materials, which are designed to protect the wearer's body, except the hands, from heat and/or flame. Limited flame spread (A1 – surface ignition/ A2 – edge ignition) is tested according to a method which is given in ISO 15025. To fulfill the requirements in EN ISO 11612, the clothes must also protect against at least one form of heat. The heat can be conveyed through convection B (level B1-B3) according to ISO 9151, through radiation C (level C1-C4) according to ISO 6942, splashes from molten aluminium (level D1-D3) or splashes from molten iron (level E1-E3) according to ISO 9185, or contact heat (level F1-F3) according to ISO 12127.

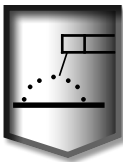

## EN ISO 14116

**Protective clothing. Protection against heat and flame. Limited flame spread materials, material assemblies and clothing.**

This standard specifies the performance requirements for the limited flame spread properties of materials, material assemblies and

protective clothing in order to reduce the possibility of the clothing burning and thereby itself constituting a hazard. The material(s) complies with EN ISO 14116 indexes 0/0/0 - limited flame spread index / number of washes with letter H, I or C / washing temperature H - domestic wash, I - industrially wash, C - dry-clean.

Garment approved according to index 1 shall not be used next to the skin, and shall only be used together with garments approved according to index 2 or 3.

## EN ISO 11611

**Protective clothing for use in welding and allied processes.**

This part of this European standard specifies test methods and general performance requirements for protective clothing for operators engaged in welding and allied processes with comparable risks. The garment is intended to protect against splashes of molten metal (EN 348), short contact with flames (EN 532) and ultraviolet radiation, plus use for up to eight hours at ambient temperature.

## EN 14058

**Protective clothing. Garments for protection against cool environments.**

This standard specifies requirements and test methods for performance of single garments for protection against cooling of the body in cool environment (air temperature of -5 °C and above). All garments approved according to EN 14058 shall be marked with pictogram indicating that protection against cool environment is offered with the appropriate performance level:

Y - Thermal resistance class (classes 1-3)

## Helly Hansen Workwear Lifejackets 150 N and 275 N

These lifejackets provide face-up flotation with levels of support sufficient for various open and rough waters uses. Life jackets have a buoyancy distribution sufficient to turn most users, when tested on users wearing swimming costumes according to 12402, to a position where the mouth has a defined freeboard above water's surface even when the user is unconscious.

**ISO 12402** give guidance on the design and application of personal flotation devices (PFD) for persons engaged in activities, whether in relation to their work or their leisure, in or near water. PFDs manufactured selected and maintained to this standard should give a reasonable assurance of safety from drowning to a person who is immersed in water.

Helly Hansen Work Wear sells PFDs that do not require intervention (automatically operating PFDs). They are suited to activities where persons are likely to enter the water unexpectedly, whereas PFDs requiring intervention e.g. manually inflated PFDs are only suitable for use if the user believes there will be sufficient time to produce full buoyancy, or help is close at hand. In every circumstance, the user should ensure that the operation of the PFD is suited to the specific application. The conformity of a PFD to the part of 12402 does not imply that it's suited for all circumstances.

Under certain conditions such as rough water and waves, the use of watertight and multilayer clothing, which provide intentionally or otherwise additional buoyancy, or the use of equipment with additional weight such as tool belts will likely alter the performance of the PFD. Users, owners and employers need to ensure that this is taken into account when selecting a PFD. Similarly, PFDs may not perform as well in extremes of temperatures, although fully approved. PFDs may also be affected by other conditions of use, such as chemical exposure and welding, and may require additional protection. The user has to be assured that the PFD will not be adversely affected.

The relative amount of required inspection and maintains is a factor of paramount importance in the choice and application of specific PFDs. Its potential length of service often depends on the conditions of use and storage, which are the responsibility of the owner, user and /or employer.

## SOLAS. Level 275 N

This level is intended primarily for offshore use under extreme conditions and by people who are carrying significant weights and thus require additional buoyancy. It is also of value to those who are wearing clothing which traps air and which may adversely affect the self-righting capacity of the lifejacket.

## ISO 12402-3. Level 150 N

Life jackets performance level 150 is intended for general offshore and rough weather use where a high standard of performance is required.

Requirements for lifejackets on large, commercial seagoing ships are regulated by the International Maritime Organisation (IMO) under the International Convention for the Safety of Life at Sea (SOLAS) ISO 12402-1 addresses lifejackets for seagoing ships.

- **It is essential that the owner, user and employers choose those PFDs that meet the correct standard for the circumstances in which they will be used.**
- **PFD needs to be secured when worn, in order to provide positive support in the water and to allow the user to swim or actively assist himself or others.**
- **No PFD guarantees rescue but is seen as means to reduce the risk of drowning.**

# SIZE GUIDE

## EN 340:2004 Protective clothing - General requirements

Helly Hansen protective clothing is designed and manufactured in such a way that it does not have any effect on the user's health or hygiene. The design guarantees a correct fit and protection for the body when used correctly.

The design and material offer function and comfort. The material offers good fade-resistance, stability, strength and durability, to ensure that the garments have a long life, even with heavy use and many washes.

Size grading is based on body measurements in centimetres, see the size guide. All garments are properly marked on garment labels and on external labels to indicate the information required for the standard.
